

Feedbacks Slovakia

I don't know how to start. There were so many beautiful and great moments. On the first day we arrived at the host families. My exchange partner and her family were so nice and we had a lot of fun. We saw a lot of castles, but the best was Bojnice, I have never seen such a beautiful castle. The fair trade workshop was also great, we had to take an original photo of a fair trade product. But there were a lot more cool things like the day on the farm, the glassworks and the zoo. We also had a lot of fun in the evening with the Slovakian students. We did a lot of funny things for example virtual reality games or just hanging around with the other students. After this week I can say it was one of the greatest journeys I have ever made. A big thank you to all the Slovakian people. (Stephan Pajer)

I have never been to Slovakia, so this trip was such an awesome experience that I would like to visit it again. Although the weather got worse the longer we stayed I really enjoyed staying there. The funniest time were the evenings after the program when we were going out in a big group. Now something about the official program. We visited Bojnice castle which was really beautiful and the zoo. Another cool thing was a challenge where we had to take a photo with a fair trade product. Unfortunately Bojnice castle was not the only one we visited, they were really too many. I was staying with a really nice host family with an annoying cat. I kind of felt at home there. They were so nice and cool people so it was really hard to say good bye. (Jakob Leifhelm)

My week in Slovakia was awesome. I was in a really friendly family and met really cool people. The program was most of the time really interesting, I really learned something and I probably know every castle around Handlova. Before the week I was a little bit worried about the trip, but now I am even more happy that I was there. My exchange partner and me were really different that's why I could not really connect to her, but I met two amazing girls and some other really cool guys from Slovakia. The best time was always after the program when we went out in a big group that's why I would have liked to have more free time. All in all not even the bad weather could stop me from having fun. A nice side effect of our adventure was learning some Slovakian words and it really gave me the motivation to learn the language. Handlova was really special for me because there are so many young people and I really liked the „Handlova hills“ where we were in the evening on our own. The meeting point was always the restaurant „People“, not because of the food and drinks, but because of the wifi.

Now I can say that I have real friends in Handlova and promised I will come back because a part of my heart is still there. D'akujem for everything. (Beatrice Berchtold)

I think that the Erasmus meeting in Handlova was really great. The hosts were very nice and friendly. We saw a lot of the town, for me Handlova is a very small town. The food and drinks were very cheap. In the evening we were always together with the other Austrian students and their hosts. At the end of the week there were also the Italian and German students with us. During the day we saw many sights. We were also at their school and on a farm. We visited three big castles which were all very beautiful. I think that it was a great and funny week, but the temperature was very cold. (Daniel Zojer)

At first I must say that I really enjoyed the week in Slovakia. On the first day we got to our host families. My host family was very nice. In Slovakia there are many beautiful castles, but the most beautiful is Bojnice. I have never seen a castle as beautiful as this one. The day at the farm was also great and the food there was very tasty. We also saw glassworks, which was very interesting to see how glass is made and we could also buy some souvenirs for our parents. I also enjoyed the zoo in Bojnice very much. We also enjoyed the evenings together very much with playing vr games and just hanging around. But the most funny evening was the last one on which we were hanging around in a very large group. I made new friends with other students especially from Slovakia and Italy and I also got to know the other students from Austria better. D'akujem. (Anton Zöscher)
