

Hotel Chocolat

In preparation for the next stage of the Erasmus+ Fair Trade Project, TDA students visited a local chocolate factory that prides itself on its ethical trading policy, supporting the workforce and economy of Saint Lucia in the Caribbean. During the visit students met with the management team to learn about the strategy and ethics behind the business before moving on to the factory floor and chocolatiers room where they assisted in the production of chocolate. This experience demonstrated the science behind making chocolate, the responsibility of ensuring that the crop growers are fairly treated during the purchase of produce and the importance of appreciating the quality and origin of crops.
